

## Columbia Shuswap Regional Invasive Species Watchlist 2020

PROVINCIAL PRIORITY DEFINITIONS (as per February 2020 list: [https://www2.gov.bc.ca/assets/gov/environment/plants-animals-and-ecosystems/invasive-species/guidance-resources/provincial\\_priority\\_is\\_list\\_final2019\\_march2\\_2020\\_posted\\_online.pdf](https://www2.gov.bc.ca/assets/gov/environment/plants-animals-and-ecosystems/invasive-species/guidance-resources/provincial_priority_is_list_final2019_march2_2020_posted_online.pdf))

Prevent	1	Species determined to be high risk to BC and not yet established. <b>Management objective</b> is to prevent the introduction and establishment.
Provincial EDRR	2	Species is high risk to BC and is new to the Province. <b>Management objective</b> is eradication.
Provincial Containment	3	Species is high risk with limited extent in BC but significant potential to spread. <b>Management objective</b> is to prevent further expansion into new areas with the ultimate goal of reducing the overall extent.
Regional Containment/Control	4	Species is high risk and well established, or medium risk with high potential for spread. <b>Management objective</b> is to prevent further expansion into new areas within the region through establishment of containment lines and identification of occurrences outside the line to control.
Management	5	Species is more widespread but may be of concern in specific situations with certain high values - e.g., conservation lands, specific agriculture crops. <b>Management objective</b> is to reduce the invasive species impacts locally or regionally, where resources are available.
