Golden IPMA Priority Plant List

DDENIENT High priority on sign at		in the vertice. Memore enterties
	currently known in the IPMA and/ or with	iin the region. Management objective
is to prevent the introduction and es		Duration 1
- Bighead knapweed	- Greater knapweed	- Russian knapweed
- Black knapweed (BC)	- Himalayan blackberry	- Scotch broom
- Brown knapweed	- Himalayan knotweed	- Scotch thistle
- Buffalobur	- Japanese butterbur	- Spurge laurel
- Bur chervil	- Longspine sandbur	- Tansy ragwort
- Colt's foot	- Marsh plume thistle	- Teasel
- Field scabious	- Nodding thistle	- Tree of heaven
- Garlic mustard	- North Africa grass	- Wild chervil
- Giant hogweed	- Plumeless thistle	- Wood sage
- Giant knotweed	- Puncturevine	- Yellow archangel
- Gorse	- Rush skeletonweed (BC)	- Yellow flag iris
	ies extremely limited in extent (less than	
	boundary. Management objective is era	
- Common bugloss	- Hoary cress	- Wild parsnip
- Cypress spurge	 Short-fringed knapweed 	
	nited extent and/ or significant potential	
to prevent further expansion into ne	w areas with the ultimate goal of reducing	ng the overall extent.
- Baby's breath	- Hoary alyssum	- Poison hemlock
- Blueweed	- Japanese knotweed	 Policeman's helmet
- Bohemian knotweed	- Knapweed spp. (BC)	- Scentless chamomile (BC)
- Common Tansy	- Leafy spurge (BC)	- Spotted knapweed (BC)
- Diffuse knapweed (BC)	- Meadow knapweed (BC)	
CONTAINMENT – Species is establis	hed or with high potential for spread. I	Management objective is to prevent
Turther expansion into new areas wi	thin the region through establishment of	containment lines and identification
further expansion into new areas wire of occurrences outside the line to co		containment lines and identification
